                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 GENERAL INFORMATION:

GENERAL INFORMATION:

APPLICANT: NATIONAL RESEARCH COUNCIL OF CANADA

APPLICANT: NATIONAL RESEARCH COUNCIL OF LORINIFICATION OF NOVEL BROAD-SPECTRUM

TITLE OF INVENTION: A GENOMIC APPROACH TO IDENTIFICATION OF NOVEL BROAD-SPECTRUM

TITLE OF INVENTION: ANTIMICROBIAL PEPTIDES FROM BONY FISH

TILE REFERENCE: 6899-6/PAR

CURRENT APPLICATION NUMBER: US/10/525,126

CURRENT FILING DATE: 2005-02-18

PRIOR APPLICATION NUMBER: PCT/CA03/01323

PRIOR APPLICATION NUMBER: 60/404,922

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 6870, Application US/10953349

Publication No. US20060107345A1

GENERAL INFORMATION:

APPLICANT: ALEXANDROV, Nickolai et al.

TITLE OF INVENTION: SEQUENCE-DETERMINED DNA FRAGMENTS AND CORRESPONDING POLYPEPTIDES

TITLE OF INVENTION: ENCONDED THERBY

FILE REFERENCE: 2750-1579PUS2

CURRENT APPLICATION NUMBER: US/10/953,349

CURRENT FILING DATE: 2004-09-30
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          NUMBER OF SEQ ID NOS: 40252
